

maXbox: The All-in-One Portable Scripting Studio

CORE POWER & PORTABILITY

Zero-Installation Executable

A self-contained virtual machine and bytecode interpreter in one single EXE file.

Massive Built-in Library

maXbox

Zero-Install, Portable Scripting Engine & Compiler

LIMITLESS APPLICATIONS

Advanced Data Science & ML

Execute Python machine learning workflows, ARIMA forecasting, and neural network functions directly.

Universal API Connectivity

Native support for REST APIs, JSON parsing, GPS tracking, and barcode generation.

Hardware & Media Control

Integrated tools for Arduino/IoT coding, MIDI music systems, and 3D graphics.

 **37,721+**
Functions

 **4,343**
Objects

 **3,860**
Precompiled Units

Cross-Platform Versatility

Runs on Windows, Linux, and macOS via Wine with full Unicode support.

Data Table

Library Scale: 37,721+ Functions

Version 5.2: 64-bit Unicode & Python Integration

Learning Hub: 190+ Integrated Tutorials
